

<b>Funding Agency</b>	 Nablus Municipality
<b>Title</b>	<b>Steady State Modelling of the Eocene Groundwater system in the Nablus Area</b>
<b>Objectives</b>	<ol style="list-style-type: none"> <li>1. To assess the water budget of the Eocene system in the Nablus Area.</li> <li>2. To study the movement directions of groundwater system in the Nablus Area.</li> <li>3. To study the impact of drilling a new well or wells in the Eocene aquifer of Nablus city.</li> </ol>
<b>Project Partners</b>	Nablus Municipality

## Project Outputs

### Report

A Preliminary Steady-State Groundwater Flow Model for the Eocene Aquifer of the City of Nablus
